

# FYP Sprint Retrospective

<b>Sprint Number</b>	2
<b>Completed By</b>	Jake Humphreys

## Successes

- A much more reasonable amount of work was scheduled for this sprint.
- Implemented two technologies I have never worked with before:
  - Google Maps API
  - SignalR
- Most core functionality has been implemented into the Web application and API.

## Improvements

- The sprints completion date became derailed and was completed later than originally speculated.

## Commitments

- Retain focus on the next sprint and complete to the specified deadline.
